Firmware version: 1.01.10 EX
Release date: September 15, 2006

Bug Fixes:

Performance of Battery Indicator feature improved

Firmware version: 1.01.09 EX
Release date: September 1, 2006

New Features:

- Built-in WiFi 802.11g support and WiFi toggle utility in the Windows CE system tray
- Extended battery indication, showing battery level in percentage and battery time remaining
- System shutdown using the Suspend button. Pressing the Suspend button for more than four seconds shuts down the system
- Optional automatic system shutdown after 60 minutes of suspend
- Added Inspiration™ software
- Added NZip file compression utility, also supporting WinZip™ files
- MultiLab icon shows up immediately in the start menu
- Certification Enrollment tool was added for enhanced network support

Bug Fixes:

- User defined sensors in Multilab now working at 20800/sec rate
- Touch screen noise removed
- Audio background noise removed on speaker and microphone
- Shortcut to Office Templates folder in *My Documents* now working
